## Symmetry Draw.

### On-line resource instructions.

Turn your interactive whiteboard into a two axis symmetry canvas with this teaching resource. As you draw in one quadrant your drawing is immediately repeated as a reflection in the other quadrants. You can also manipulate other shapes within the quadrants.

## **Buttons**

The Canvas: Draw anywhere on the canvas and see it duplicated in the other quadrants. Note: do not use your IWB software to draw, just click or press directly on to the canvas.

The Shapes: Clicking one of these places it and its 3 reflections onto the board. Move any one to show how its movements are echoed by the others.

Rotate Arrows: These spin the shapes clockwise and anti-clockwise.

Colour Circles: Choose which colour to draw in.

Grid: Places a squared grid on to the canvas for demonstrating distances from the axis.

Clear: Clears drawings and shapes from the screen.
