## Measurement Scales

### **On-line resource instructions.**

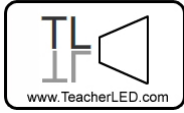

Teach your students about measurement scales using this resource for your interactive white board. Generate examples using different scales on different devices at the press of a button.

The “Generate” button under the words “On the line” will provide a random example that has a value of one of the lines of demarcation.

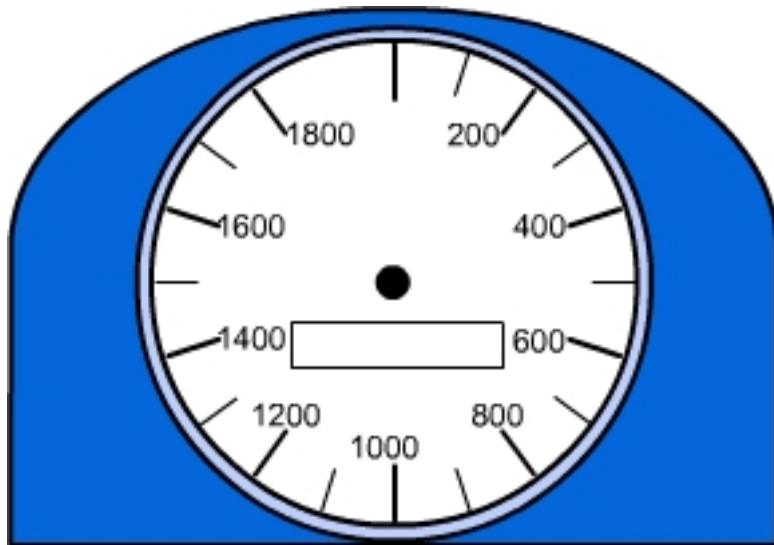

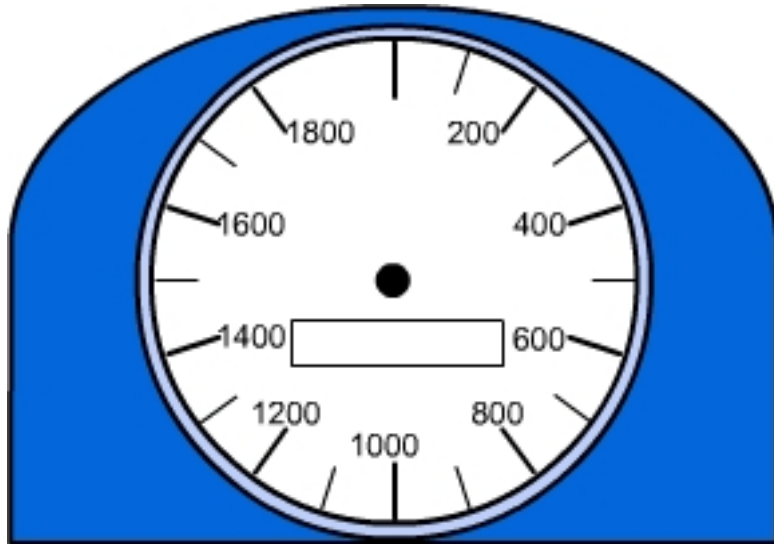

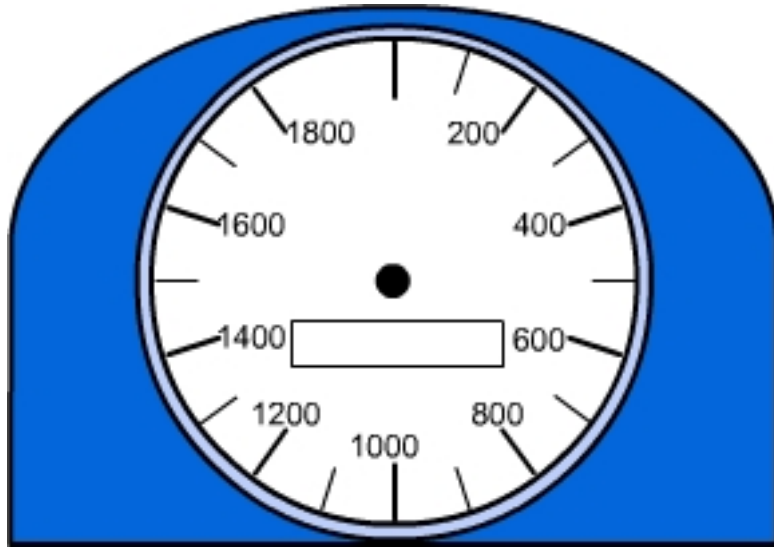

The “Generate” button under the word “Random” will provide a completely random value that will often fall between the lines of demarcation

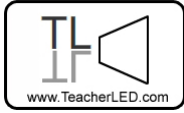

Choose between different measurement devices using the arrow buttons.

The printable resources match the on-line resource. In the case of the dial based devices students can create a movable needle.
