## Survey Taking.

### On-line resource instructions.

Conduct a class survey from your Interactive Whiteboard. Demonstrate the use of tallies and frequency charts. Immediately generate a pie chart and bar chart from your results and compare how useful they are in presenting data.

What type of transport did you use to get to school today?

Question Topics	car		
Transport	bus		
Pets	bicycle		
TV	walk		
Food	other		
	Total

## **Buttons**

Question Topics: Use one of these buttons to select one of the four predefined survey topics.

Tally Section: The areas of the table where the tally marks will go are clickable. Doing so places the next tally mark in there. The blue X in a circle removes a tally mark. A maximum of 20 is allowed.

Frequency Section: The area of the table where the frequency will go is by default covered with a blue panel. This is done to encourage students to count up the tallies before it is revealed. Reveal by dragging the blue cover to the right.

Random Fill: If you do not wish to conduct a class survey but want to go straight into discussing the presentation of the data, click this to fill the table with random data. You can click repeatedly until a satisfactory data set is generated.

Clear All: Clears the table and all associated diagrams.

Pie: Changes the screen to one where the data is presented as a pie chart. This screen has a button called Tally which will bring up a miniature version of the completed table, click to drag it to another position. It has another button called Table which returns you to the first screen.

Graph: Changes the screen to one where the data is presented as a bar chart. This screen has a button called Tally which will bring up a miniature version of the completed table, click to drag it to another position. It has another button called Table which returns you to the first screen.
