Rotational Symmetry

On-line resource instructions.

Demonstrate the use of tracing paper in checking the rotational symmetry of a shape. Using “virtual” tracing paper you can demonstrate this method using an interactive whiteboard.

Select a shape from those on the left and right.

Visit the website for the matching online resource

Click Paper to place a piece of tracing paper over the shape. Select the colour to trace the outline of the shape. Outline the shape by drawing on the tracing paper.

Drag the Rotate button to rotate the paper. The paper's centre will automatically align with the shape's centre.

Change the shape by clicking a new one.

Change the paper by clicking Paper again.

A grid can be turned on or off using Grid.
